Repair of Beomaster 1600 Sno 2629031 type1702

Dead ?

I cannot offer any warrenty on the Switches or Tractor belts on this machine as they cannot be replaced and are unreliable ?? on a good day But I will do my best to get the machine up and running the best I can But no promises

Dead Mains transformer short Replaced

Output PCB LHC short Replaced

Tuner PCB Burnt protection resistor due to cap being Short Repaired and serviced

Replaced on /off switch

Replaced front platic support for tuner pcb

So I have replaced all the caps on all the PCB ? Output PCB , PSU PCB Tone control PCB and the Tuner PCB and it now works and I have also replaced the trimmers and adjusted them on the output pcb

Sounds good the switched are noise I have tried to clean them but using them it is getting better the more its used the better ?

FM Tape & Phono now all work
